Allowable Subject Matter

Claims 1 to 30 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims (1 , 10 , 12 and 24) including the Liquid crystal display device as recited including "wherein each pixel region includes: ... at least one common line in the pixel region, the common line crossing the data lines, the data electrode, and the common electrode, wherein the common line is formed on a different layer in a cross sectional view taken perpendicular to the surface of the

substrate from the gate line." (cl. 1) ; "wherein each pixel region includes: at least one light shielding layer on the pixel region, the light shielding layer including light shielding lines that each cross the data lines, the data electrode, and the common electrode at respective ones of the data line bent portions, the data electrode bent portions and the common electrode bent portions, wherein the at least one light shielding layer is formed on a different layer in a cross sectional view taken perpendicular to the surface of the substrate from the gate lines." (cl. 10) ; wherein each pixel region includes: a plurality of data electrodes and common electrodes each having a plurality of segments intersecting at bent portions, the data electrode segments each substantially parallel to a common electrode segment of the plurality of common electrode segments; a common line on bent portions of the data lines, the data electrodes and the common electrodes; and a plurality of auxiliary common lines on bent portions of the data electrodes and the common electrodes." (cl.12) and "each pixel region includes: a plurality of data electrodes each including a plurality of first data electrode segments intersecting at data electrode bent portions; wherein the data electrodes include a plurality of second data electrode segments that connect adjacent data electrodes at data electrode bent portions and that overlap the common lines." (cl. 24) .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
